# CLOUDS, CLIMATE, AND CLEAN AIR: PATTERNS IN OUR ATMOSPHERE

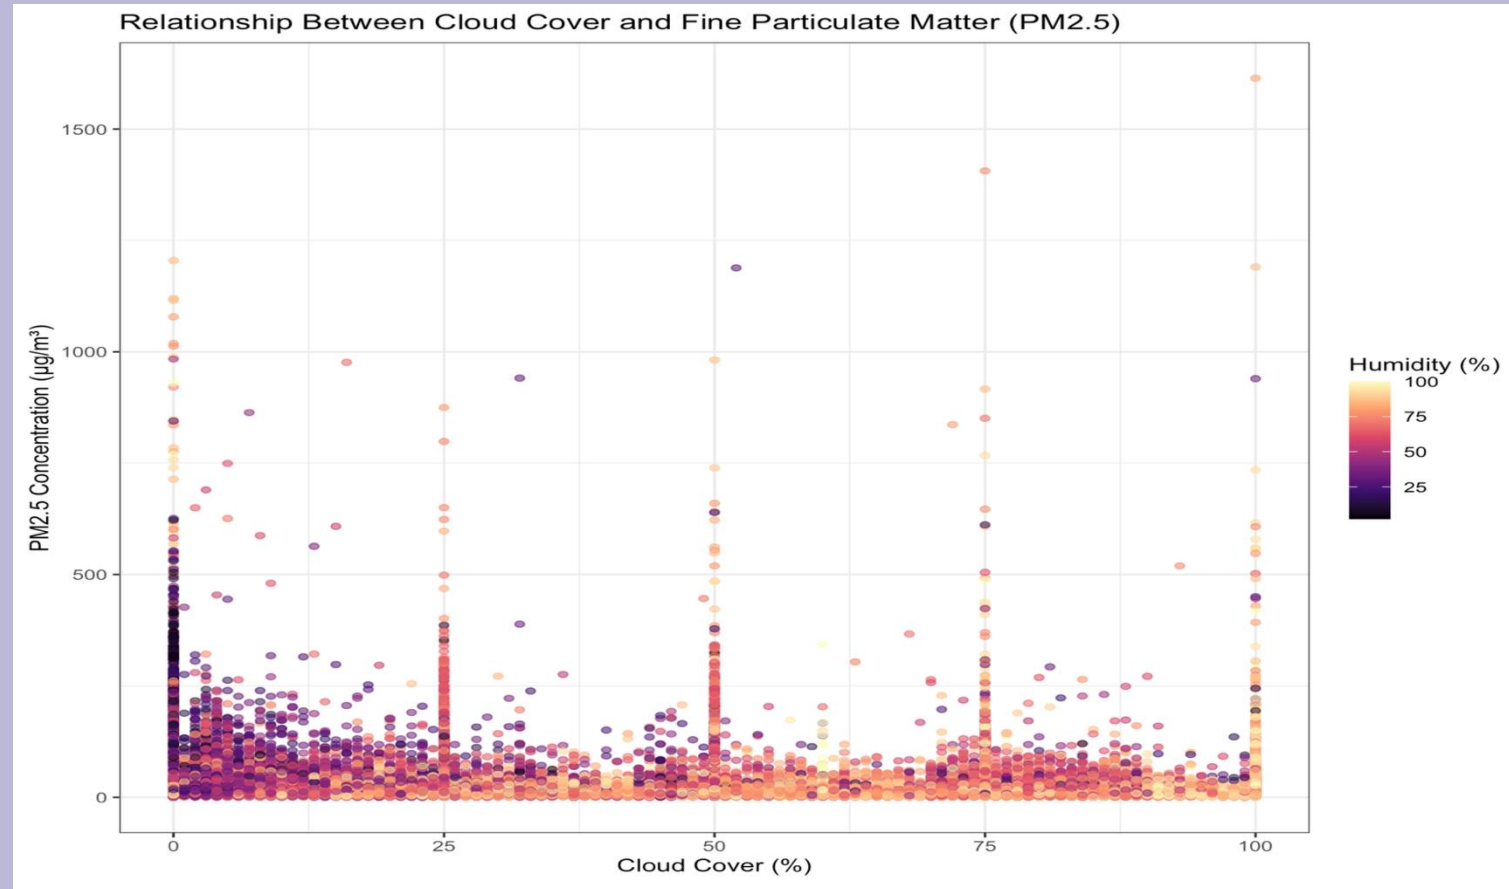

Data Visualizations by Jeanette Cook

---

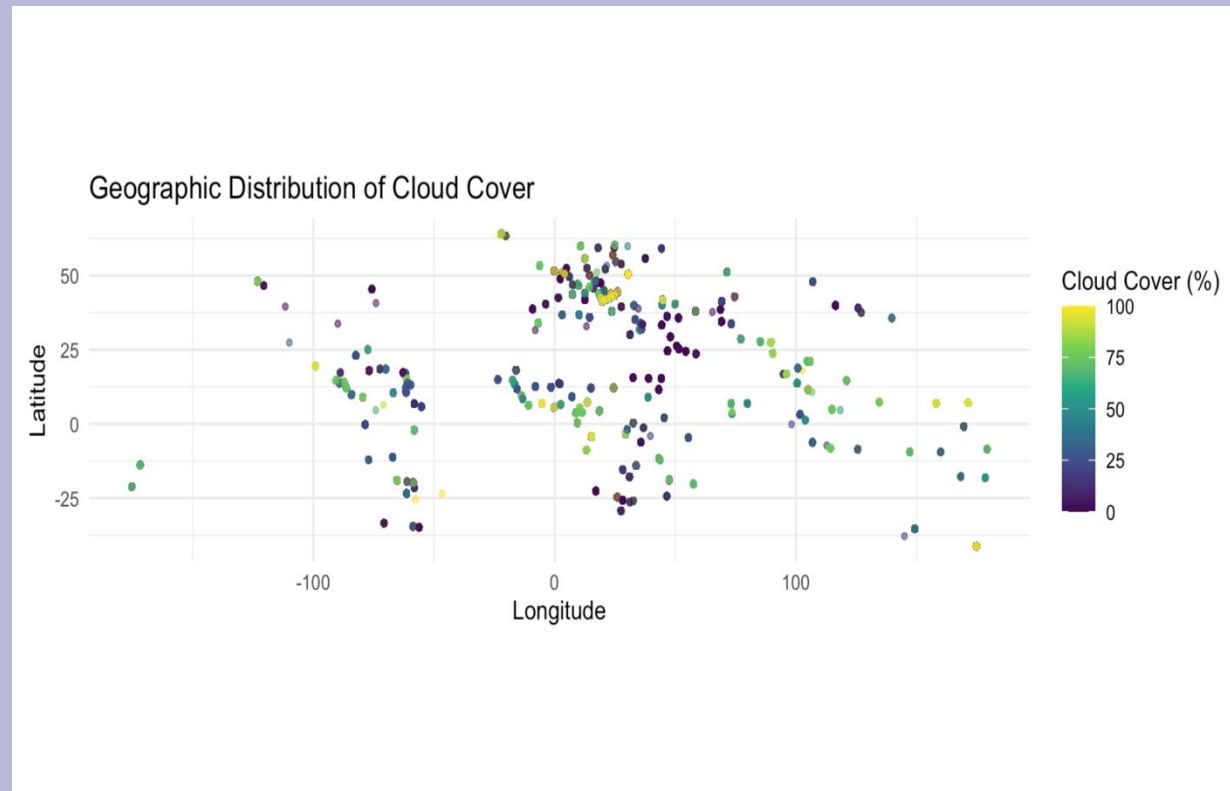

# DATA

- Dimensions: 38 x 11317
- Cleaned my air quality data.
- Variables of interest are cloud cover, air quality, and temperature.

---

# INTERESTING GROUPINGS

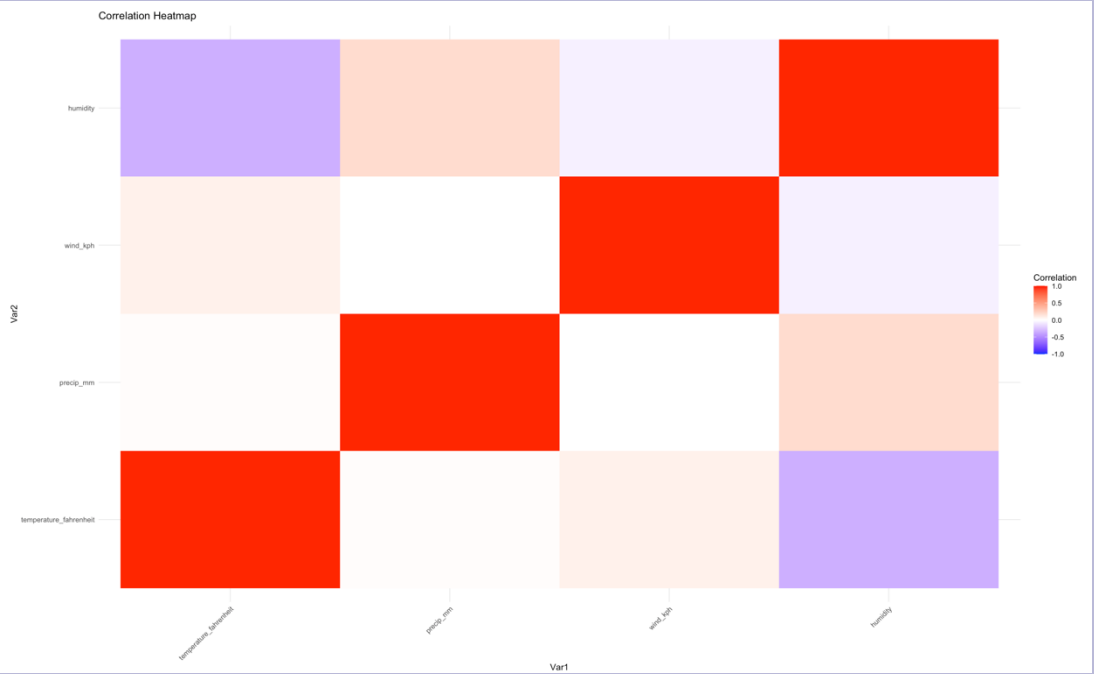

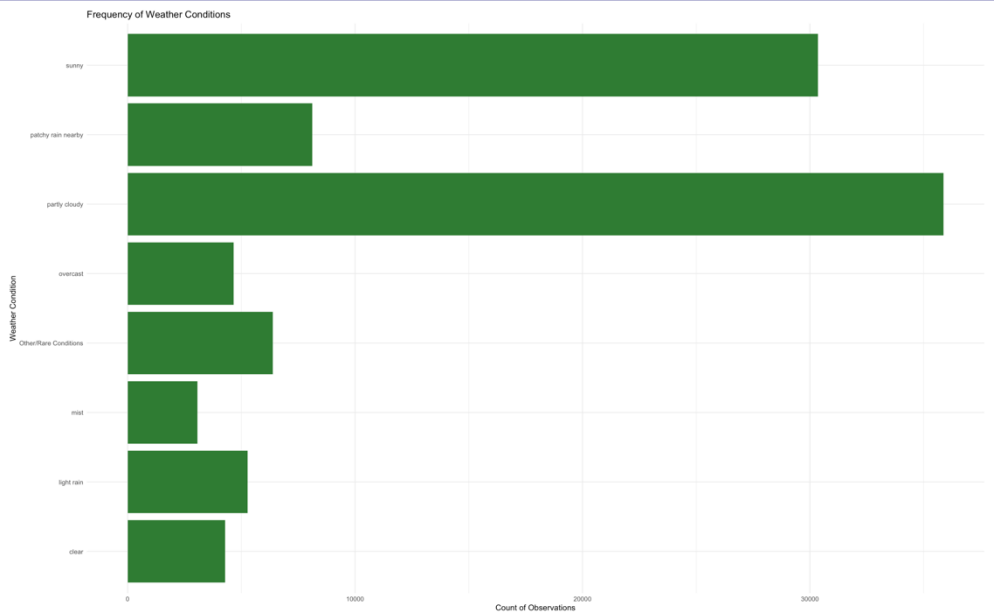

Outliers:

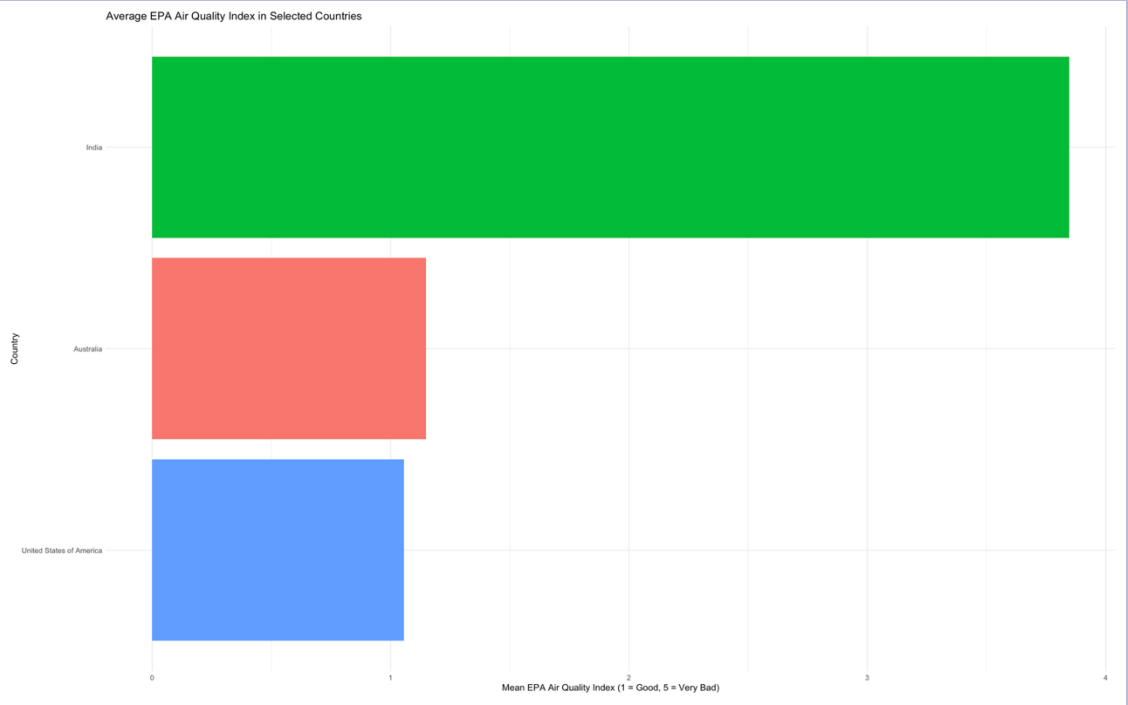

- Temperature
- Air quality
- Cloud Cover vs. UV Index

• Some interesting data groupings:

- Air quality distribution
  - Cloud Cover and Humidity
  - Weather condition frequency
  - Temperature Distribution
-

# VISUALS

---

# RESULTS

- I found:
- Strong positive correlation between clouds and humidity.
- Interesting distribution of pollutants.
- Relationship between cloud patterns and weather conditions.
- Relationship between cloud cover and temperature
